

Project: StudyBloom *(Where focus blooms)*

Project Description:

StudyBloom is a pomodoro timer website, that helps staying focused. It is based on the technique of doing a particular work for 25 minutes and then taking a break, which helps staying consistent.

It has a floral background with calm pastel aesthetics.

It is built with the help of HTML, CSS and JavaScript.

HTML(for structure)

CSS(for design and layout)

JavaScript(for timer logic)
